BEFORE STARTING THE GAME

When using the Virtual Boy, several adjustments must be made before starting the game. For your health and safety, be certain to perform these adjustments each time you play. If you wear glasses or contact lenses, be sure to wear them while using the Virtual Boy.

Insert the Game Pak into the Virtual Boy, then turn the POWER switch located on the front of the controller to the ON position. When the screen pictured to the right appears, continue with the IPD and FOCUS adjustments.

Press the START button to display the "IPD and FOCUS adjustment screen." Both adjustments are made using this screen.

IPD ADJUSTMENT

This adjustment sets Virtual Boy to the distance between your eyes (the Inter Pupil Distance).

While looking at the adjustment screen, turn the IPD dial located on top of the Virtual Boy until you can see a mark in all four corners of the screen, as shown on the screen to the right.

The best adjustment may allow you to see only three marks, or four slightly blurred marks. When you have completed the IPD adjustment, proceed with the FOCUS adjustment.

FOCUS ADJUSTMENT

This adjustment makes sure that you see the game image in the Virtual Boy display clearly.

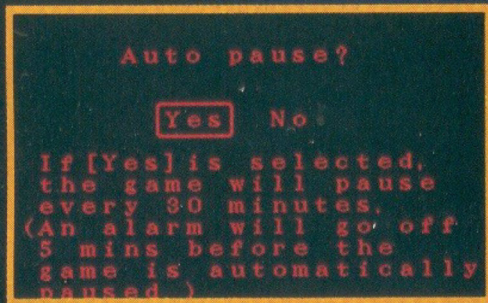

Move the FOCUS slider to the CENTER POSITION as marked on the housing. For most people, the center position should give you the clearest image. If the image is still fuzzy, adjust the FOCUS slider right or left until the image is sharp and clear.

AUTOMATIC PAUSE FUNCTION

All Virtual Boy Game Paks contain an automatic pause function that will cause the game to pause after about 30 minutes of game play. When the game pauses, take a break and give your eyes some rest. To resume game play, press **START**.

After completing the **IPD** and **FOCUS** adjustments, press the **START** button and the screen pictured at right will appear. The automatic pause is preset to the **ON** position. Nintendo recommends that you **ALWAYS** set the automatic pause to **ON**. To override the setting, use **←** or **→** on the **L+Control Pad**, then press the **START** button to begin the game demo. Pressing **START** again will advance you to the game title screen.

After playing the **JACK BROS.** for 30 minutes, or after completing a stage, the game will automatically pause. Please take a break and rest. After your rest is completed, press the **START** Button to restart the game

THE JACK BROS. STORY

Every year on Halloween morning, the portal to the World of Fairies opens, allowing a pathway to form between their world and ours. This year, the mischievous Jack Brothers from the World of Fairies have decided to set off on an adventure in our world. They will have to pass through the portal again by midnight or be banished from their world forever.

The thrill of their adventure takes their mind off the clock, and before they know it, the 11 o'clock hour is upon them. As they start to race through the long pathway to their home, Pixie the Fairy appears and offers to show them a shortcut to the World of Fairies. The shortcut is dangerous and seldom used, but if they used their regular route, they will not make it back in time. The Jack Brothers have no choice but to follow Pixie and choose their battles wisely. They can only hope that it's not too late....

ABOUT THIS GAME

To return to the World of Fairies, you must clear six different areas within the allowed time limits. Each area consists of several different floors. You must collect all of the keys in each area to continue on. Once you have collected all of the keys on one floor, the doors will all open at once and you will be able

to jump off to the lower floor. Continue down to the lowest floor and defeat the boss to move on to the next area. Be very careful, though. Enemies and traps await you in every nook and cranny. Each time you suffer damage from an enemy or trap's attack, your remaining time will decrease by five seconds.
