1. You will need Thunderstrucks' HyperBoyFlasher GUI to flash games to your HyperBoy. HyperBoyFlasher can be downloaded at: https://www.retroonyx.com/product-page/hyperboy-32mbit-flashcart

2. You may also need FTDI VCP drivers for the HyperBoy USB port to be recognized on your computer. Download those at: https://ftdichip.com/drivers/vcp-drivers/

3. Once the above is completed and installed, plug your HyperBoy into a USB port of a computer and run HyperBoyFlasher.exe.

4. Select "Flash Game" to select a game and load your ROM file.

5. Once you have selected your ROM file, click "Flash" to start uploading the ROM to your HyperBoy.

6. When the upload is completed, unplug your HyperBoy from the USB port and insert it into your VirtualBoy. Turn on power to your VB and enjoy!
