

Mail Plane

Value: \$20.00
 Platform: Nintendo Virtual Boy
 Version: Japanese
 Original release: 1995
 Developer/publisher: Nintendo

Virtual Bowling

Value: \$500-800
 Platform: Nintendo Virtual Boy
 Version: Japanese
 Original release: 1995

Virtual Bowling

Value: \$500-800
 Platform: Nintendo Virtual Boy
 Version: Japanese
 Original release: 1995
 Developer/publisher: Athena/Nintendo

Athena's only game for the Virtual Boy is exceptionally rare and highly sought after. Like Gundam Dimension Battle the game was made and sold in very small quantities and as the platform steadily increases in popularity, more and more collectors push the price up. Incidentally the price here would pale into significance should prototypes such as *VB Waro Land* and *Mario Adventure*, which were never released, appear on the market.

Snatcher

Value: \$90-110
 Platform: Sega Mega-CD
 Version: UK
 Original release: 1995
 Developer/publisher: Square

One Square's earliest prodigal of Platinum's interest in any English language release on the Mega-CD. Going, extremely sought after especially in UK guise, the plot goes more than a little mad in the 300+ hour run. This is a Raven/Kalishan collector's must-have, and alongside Lunar, the most reason to hold in the whole hardware.

Dragon Ball GT: Final Bout

Value: \$100-140
 Platform: Sega Saturn
 Version: UK
 Original release: 1995/1996
 Developer/publisher: Banami

Incidentally the final game continues to remain in the series and consistently commands very high prices. A sealed copy sold for \$470 recently. Limited to 10,000 copies the game is a cult classic due to the entire team's support Japanese popularity. Besides that, very poor games will sell well above their gameplay's worth if the conditions are right. The Japanese version is worth a fraction of this version.
