BEST OF THE REST

Nintendo 64 wasn't the only game system in town at Shoshinkai/Space World. Japanese third-party publishers also showed off their Super Famicom games, Game Boy titles and Virtual Boy products to the thousands who attended.

As always in Japan, much of the big news centered on RPGs for the Super Famicom. The biggest title to appear in years, *Dragon Quest VI*, debuted just two weeks before its scheduled release. It is expected that over three million *Dragon Quest VI* games will be sold in Japan almost as soon as they hit the street. In the past, the first day that a *Dragon Quest* game went on sale became a defacto public holiday in Japan. School kids and older gamers would line up in endless queues in order to grab their own copies of *DQ*.

Enix is hoping that the old magic continues. As for the game itself, *Dragon Quest VI* contains many of the game elements and style that have made the series such a hit in Japan: a huge overworld to explore, a distinguishing plot line, tons of battles, spells, weapons, large parties, ships—in short, everything you got in the earlier *Dragon Quest* games plus improved graphics and music. (Nintendo Power will feature a special look at this game next month.) Enix also displayed *Dark Half* for the first time. One innovation in the battle sequence is that characters attack within a limited range, adding an extra element of strategy. If an enemy stands outside the

range of your spell, you won't hit it at all. The third game of note from Enix was *The Legend of Magatama*. Borrowing freely from adventure games such as *The Legend of Zelda: The Adventure of Link*, *Magatama* features side-scrolling, real-time battles in which the hero uses his sword or casts spells and he travels with a companion bird who can lift him over obstacles for short flights.

After *Dragon Quest VI*, the most talked-about RPG at the show was probably *Tales of Phantasia*, from Namco which featured truly beautiful graphics. Square Soft showed off *Bahamut Lagoon*, which features the dragon king from *Final Fantasy*. Other RPGs at the show included *Farland Story 2* and *Ys V*.

Capcom featured several titles starring Disney characters, including *Maui Mallard*, *Pinocchio*, *Mickey & Donald 3* and *Donald Duck*. All of the games looked great, and at least *Maui Mallard* and *Pinocchio* will be released in the U.S. later this year.

The Japanese gaming market always contains some interesting games the likes of which we never see on this side of the Pacific. A puzzle game from Hudson called *Same Game* puts a unique twist on customized gaming. The *Same Game*

Pak includes a slot in the top. Players insert a data card into the Pak so they can play with a particular set of characters, such as Bomberman, Mario, or Tetris

shapes. Text adventures, or sound novels, are also a popular category in Japan. Imagineer's *Getsumen No Anubis* is a sci-fi sound novel that takes place at a distant, planetary colony.

For Virtual Boy, Hudson Soft's *Virtual Bomberman* recreates the excitement of Bomberman in 3-D. Athena's *Virtual Bowling*, *Virtual Mahjong* from VAP, Bandai's *Dimension Wars* and *Polygo Block* from T&E Soft all debuted at the show. *Bound High* from Japan System was one featured game that rocked.

New Game Boy titles included *Tokyo Disneyland*, *The King of Fighters*, and a fun little RPG called *Pocket Monster* from Nintendo.

Visitors to Space World were treated to special events and demos. At the Acclaim booth, video tapes demonstrated the technique of motion-capture animation for upcoming games including *Turok: The Dinosaur Hunter* for the Nintendo Ultra 64. Show goers could catch stage shows, as well, or even compete for gaming titles. But the main

attraction throughout the show was Super Mario 64. How can you stay away from something this good? The answer is simple. You can't. The future is just around the corner.

Game Boy got its first ACM games and the return of a well-rounded friend in 1995.

1 DONKEY KONG LAND

Nintendo squeezed its big ape super star into Game Boy in this rollicking action game developed by Rare. Packing all the visual appeal of DKC into four megabits and four shades (or four colors with Super Game Boy) wasn't easy, but DKL showed that it could be done. Voters appreciated the depth as much as the amazing graphics.

2 KIRBY'S DREAM LAND 2

Being a pink, round, bag of wind doesn't ordinarily give you an edge in life, but Nintendo's Kirby turns it into a virtue. His latest adventure gave our editors some of the best all-around platform gaming action of the year. Kirby's pals added a new dimension to the huff and puff of previous Kirby games. This was a very close number two choice.

3 DEFENDER/JOUST

Nintendo's arcade classic series recreated many hit titles from the early eighties, back when most video games and a lot of today's players were still wearing diapers. Some of the games, such as Defender and Joust, rose above the primitive technology with great game play. Our nostalgic editors picked Defender/Joust as the best of this series.

4 KILLER INSTINCT

ACM technology isn't limited to apes. Nintendo's Killer Instinct for Game Boy made use of rendered characters and animations to recreate the arcade hit. KI turned out to be one of the finest fighting games ever for Game Boy. The Super Game Boy enhanced borders, color palettes and sound were cool, too.

5 MARIO'S PICROSS

Possibly the only thing more difficult than describing Mario's Picross is defeating it. This brain teaser took us all by surprise when it was released last summer, captivating us for hours on end with those fill-in-the-dot picture puzzles. It is destined to become a standard for years to come, for gamers and non-gamers alike.

THE BEST OF 1995

The first 3-D video game system showed some real depth in its debut season.

1 VIRTUAL BOY WARIO LAND

Wario Land ran away with the voting for Virtual Boy, capturing all but one of the first place votes. It's easy to see why. Wario Land has it all: special effects, a fun main character, variety, real 3-D, plenty of action and lots of hats. Wario Land shows what the Virtual Boy is all about. It's simply the best.

2 MARIO'S TENNIS

Easy play control and a host of Mario characters helped capture second place for Mario's Tennis. Early buyers of Virtual Boy received this game in the package. It may not have been as flashy as Virtual Boy Wario Land, but the 3-D tennis game served up a courtful of fun for first-time players.

3 GOLF

Although Golf didn't come out until November, it was definitely first rate. Good use of Virtual Boy's 3-D effects and multiple backgrounds made it a visual treat. The developers at T&E Soft makers of the True Golf Classics series hit the sweet spot with their excellent and realistic play control system.

4 GALACTIC PINBALL

Galactic Pinball climbed into fourth place probably because it was so player-friendly. The 3-D attributes of Virtual Boy added graphically to the game while not adding to its difficulty. The voting editors thought that Galactic Pinball would have been an excellent pinball game on any video game system.

5 RED ALARM

Last of the best, Red Alarm may have been one of the most challenging games of the year. The 3-D vector shooter kept virtual pilots hunched over their controllers as alien spacecraft and beings streamed out of a virtual universe. A very cool replay mode gave pilots the chance to relive their moments of glory.

CLASSIFIED INFORMATION

SEPARATION ANXIETY

Stage Select

If the original Spider-Man/Venom team-up was the "maximum" in mayhem, then this stunning sequel is off the scale! To skip over any particularly tough areas, enter the password S, C, B, C, R, S to access a special stage select.

Enter the following password:

**Virtual
BOY**

On one night a year, fairies come to earth to haunt, howl, and raise havoc with human kids. That night, of course, is Halloween. The Jack Bros. look forward to that spookiest of eves all year long. It is, after all, the most fun they have all year. But what happens when they don't return to their own land before the evening ends? When the mysterious fairies' portal closes before they pass through, the three mischievous brothers find out.

The Terrible Trio

Atlus's Virtual Boy romp is a great fit for players who like their puzzles packed with action. The story follows the Jack Bros. through more than fifty levels of perplexing pranks as they try to find their way home. You can select your favorite of the three bros.: Jack Frost attacks with ice, Jack Lantern flings fireballs and Jack Skelton wields a wicked blade. Each has his strength. Jack Frost, for example, is on the nimble side, while Jack Skelton relies on pure power. With them on their trek is a fairy guide who offers helpful tips for exploring new areas in the 3-D environment that has the trio popping from foreground to background.

Obstacles

Inside the various labyrinths, the Jack Bros. will encounter hazards and obstacles that will put their nimbleness and wits to the test. In some places, spikes rise from the floor, impaling hapless bros. who are standing above. In other spots, the bros. will have to figure out how to push boulders into place to block lasers and open corridors. And they'll also have to dodge the occasional Paradise, deadly spikes that fly in from the sides to flatten less-than-fleet-of-foot intruders. In any case, listen to the wise fairy guide to find out what dangers lie ahead.

MOVE THE BOULDERS

Plan ahead when pushing boulders around so you don't block your way to the exit. If you make the wrong move, you could be stuck. Sometimes you can use the stones to block lethal lasers, deadly blasts of fire, or attacks by invincible enemies.

AND USE YOUR WITS

Warps And Exits

You must find all of the keys before you can exit each area, and many areas have more than one exit. The one you choose will determine where you'll land on the level below, so you should plan your leap carefully. You can save a lot of time by landing near an exit on the next level. There are also warp platforms that you can use to move directly from point to point. Some warps will even transport you from level to level. If you've moved boulders into positions that block your path, use a warp to reset them and try again.

After you find the necessary keys, choose the best exit, then jump down to the next level. You can also save valuable time by using warp platforms to move around, even between levels.

Try all of the warps to see where they lead. On some levels, such as 43 and 44, you'll be able to warp back and forth. When you come to a place that looks inaccessible—one that's blocked by boulders, for example—try using a warp to get there.

The four continental courses of PGA European Tour appeared for Game Boy last year in a terrific game from Black Pearl and EA Sports. Now, Valderrama, Wentworth, Forest of Arden, Crans-sur-Sierre, and Le Golf National take their places on the Super NES world

stage. As in PGA Tour '96, Black Pearl makes use of the new SA-1 chip to create realistic golfing action and graphics. The putting may be difficult to master, but let's face it, you don't master real golf in a day, either. PGA European Tour differs slightly from PGA Tour '96

in that it includes just the four courses listed above. Up to four duffers can join in the action, taking turns at the controller as they challenge the best links on the continent. With less graphics information to store, the game uses eight megabits rather than 16, which should result in the Game Pak costing a few dollars less. Look for it in the stores this month or in February.

Watch out for gophers, or is it golfers?

VIRTUAL FISHING

T•HQ

The acquisition group at T•HQ has scoured the world in search of new and interesting games and recently they netted a rare Japanese specimen called Virtual Fishing for Virtual Boy. When we received an early version of the game at Pak Watch, our first reaction was, "No more bass, please." But we were pleasantly surprised. Instead of presenting the number one tournament fish in the universe, Virtual Fishing concentrates on a range of sports fish including Rainbow trout and lowland catfish. The fishing system can be broken into two parts. First, you choose a site along a river, anywhere from the mountains to the flats. Then, facing the far bank of the river, you cast your lure and reel it in. At this point, you chant "here, fishy, here, fishy" and hope that your red and black lure looks like an exotic, juicy fly to the virtual trout lurking below the virtual waves. When your prayers are answered and a monster Rainbow hits the line, a quick flick of the rod sets the hook and the screen view changes to a side-angle

showing the struggling fish under the surface. In this new perspective, your gilled adversary valiantly rages against the injustice, not to mention the hook and line. You let it run, then reel it in a bit, then let it run again, then reel, run, reel, run, reel. It's actually fun in a mindless, fishy way, but the game isn't all here yet so we don't want to make any judgement. If any bass fans out there are worried that this is a sign of the end of civilization, fear not. T•HQ is already hard at work on a second Bass Master's title.

Red snapper is always the fish of the day.

EXCLUSIVE FIRST LOOK

3-D TETRIS

NINTENDO

One year ago during the Winter CES in Vegas, your intrepid Pak Watch reporter ran into Henk Rogers, president of Bullet-Proof Software of Japan and one of the leading figures in bringing Tetris out of Russia to Nintendo. The discussion centered on Virtual Boy and how people perceive objects in three dimensions. Henk believed at the time that true 3-D puzzles might confuse players who tend to think strategically in two dimensions. Well, it seems that Henk managed to wrap his mind around the concept and get comfortable enough with it to develop 3-D Tetris. Imagine full, 3-D tetrad blocks dropping into a well. You see the shadow of the tetrad on the surfaces below, which helps you align the block so that it slips into an open space. When you fill an entire layer, the layer drops away just like a row disappearing in the original game. Players may rotate the view to a perspective that they find comfortable and choose from several options including one game in which you replicate intricate shapes composed of tetrads. Tetris awakened an entire population of latent gamers who picked it up on Game Boy and haven't put it down yet. 3-D Tetris could do the same thing on Virtual Boy. Nintendo of America plans to bring 3-D Tetris to the Virtual Boy in early 1996.

Multiple modes of 3-D madness.

DISNEY'S POCAHONTAS

T•HQ

The story of Pocahontas came to life last year thanks to the magic of Disney animation. Soon, some of that same magic will be found in the Game Boy version of Pocahontas from T•HQ. Disney Interactive licensed the Game Boy development of the game while they are creating the Super NES version in-house. Both games share several features, such as the fact that both Pocahontas and Meeko her friendly raccoon can be controlled alternately in the game. An early version of Pocahontas arrived at the Pak Watch desk thanks to T•HQ. Both princess and raccoon were animated fully and had to work together to overcome obstacles. At this stage, the game puzzles tend to be non-violent, but with an action component such as jumping to a ledge or pushing a boulder. The game design places an emphasis on low key interaction in-keeping with the peaceful nature of Pocahontas' character. According to the concept developers at Disney Interactive, the Pocahontas games are designed with a female audience in mind, but they have found that male players also enjoy the action and puzzles. Pocahontas represents a significant step forward for providing female game players with an interesting game that isn't demeaning. Good job, T•HQ and Disney Interactive!

The heart-warming story of a woman and her raccoon.

for the Super NES soon, with plenty of strategic help that may put you in the money. It's the least we can do since we're ineligible.

T+HQ ROLLS ON

Although T+HQ seems to be in love with Game Boy these days, the company has not turned its back on the Super NES, either. The PGA Tour titles *PGA Tour '96* and *PGA European Tour* are just the tip of the iceberg. Coming up in 1996, players will find three major titles from T+HQ in the first half, including *The Olympics*, *Road Rash* and a bowling game. A second Bass Master game is also on the way for the Super NES. On the smaller screen, the game link between T+HQ and Disney Interactive means that *Toy Story* will be released for Game Boy later this year.

A BILLION GAMES IS A LOT OF FUN

In November of 1995, Nintendo set a milestone (or perhaps it should be called a billion milestone) when it shipped its one billionth Game Pak. The one billionth Pak met the media at Nintendo's North Bend, Washington warehouse where product is shipped out to retailers around the country. If you want a stupid numerical comparison, assume that the average Nintendo game takes four hours to play (which is way short) then it would take more than six hundred eight-four thousand years to play one billion games. Mind you, that's not including leap year.
